

ROCK PROJECT

The rock project is designed to bring out the creativity and talents in your child.

Your child should:

1. Use ordinary rocks unless you need a special one or two for your project.
2. Create a scene. It can be anything you can think of. I have seen: Disney World, animals, a wishing well, and the Empire State Building. Anything goes! You can wash, paint, or do anything that you want to the rocks in order for them to become what you envision for your project. Hot glue, rubber cement or even airplane glue all work well on the rocks.

This project is due in class on November 16th. We will be presenting these on November 16th and 17th. Please make an index card with your name and the title of your creation on it.

Please ask if you have any questions.
